Contents Vol. 26

Vol. 26 No. 1

Research Papers

Dissolution of ammonium paratungstate tetrahydrate in aqueous ammonia before and after low temperature calcination
J.W. van Put, W.P.C. Duyvesteyn and F.G.J. Luger (Delft, Netherlands) 1

Concentration of uranyl sulfate solution by an emulsion-type liquid membrane process
T. Hirato, I. Kishigami, Y. Awakura and H. Majima (Kyoto, Japan) 19

Extraction of copper and nickel from ammoniacal leach liquor of Indian Ocean sea nodules
B.D. Pandey and V. Kumar (Jamshedpur, India) 35

The solubility of silver chloride in sulphate media
O. Dinardo and J.E. Dutrizac (Ottawa, Ont., Canada) 47

The effect of lead on the cementation of gold by zinc
M.T. Oo and T. Tran (Kensington, N.S.W., Australia) 61

The use of coal spoils as feed materials for alumina recovery by acid leaching routes. Part 6: The purification and crystallisation of chloride and chloride/fluoride leach liquors by HCl gas precipitation
P. Mahi, W.R. Livingston, D.A. Rogers, R.J. Chapman and N.T. Bailey (Birmingham, U.K.) 75

The performance of a 500 Amp rotating cylinder electrode reactor. Part 1: Current potential data and single pass studies
D. Robinson (Brierley Hill, U.K.) and F.C. Walsh (Glasgow, U.K.) 93

The performance of a 500 Amp rotating cylinder electrode reactor. Part 2: Batch recirculation studies and overall mass transport
D. Robinson (Brierley Hill, U.K.) and F.C. Walsh (Glasgow, U.K.) 115

Announcements 135

Vol. 26 No. 2

Solvent extraction of tungsten by alkylamines–hydrochloric acid and alkylamines–sulphuric acid systems
R.A. Guedes De Carvalho and M.N.M. Sampaio (Porto, Portugal) 137

A study of the kinetics of adsorption of gold and zinc cyanide onto a strong base anion exchange resin using a mini-column technique
B.D. Young, A.W. Bryson and M.R.L. Glover (Johannesburg, South Africa) 151

Gold dissolution in iodide electrolytes
A. Davis and T. Tran (Kensington, N.S.W., Australia) 163

Leaching of gold, silver and lead from plumbojarosite-containing hematite tailings in HCl–$CaCl_2$ media
J. Viñals, C. Nuñez and J. Carrasco (Barcelona, Spain) 179

The mechanisms of adsorption of $Hg(CN)_2$ and $HgCl_2$ on to activated carbon
M.D. Adams (Randburg, South Africa) 201

The effect of the iron content of sphalerite on its rate of dissolution in ferric sulphate and ferric chloride media
I. Palencia Perez (Sevilla, Spain) and J.E. Dutrizac (Ottawa, Ont., Canada) 211
Application of polynomial regression analysis to the interpretation of some types of metal extraction equilibria
W. Apostoluk (Wroclaw, Poland) 233
Precipitation stripping of lanthanum and neodymium
S. Zielinski, M. Buca and A. Szczepanik (Wroclaw, Poland) 243

Technical Note
Dissolution kinetics of some borate minerals in CO_2-saturated water
M. Alkan, M. Oktay, M. Muhtar Kocakerim and Z. Karagölge 255

Announcements 263

Vol. 26 No. 3

Research Papers
Mechanistic studies of extraction of copper (II) from aqueous acid by 5-nonyl-2-hydroxybenzaldoximes in organic solvenst. The effects of mixed solvents and modifiers
J.A. Connor, N. Tindale (Canterbury, U.K.) and R.F. Dalton (Manchester, U.K.) 265
The kinetics of vanadium (IV) extraction in the acidic sulphate–D2EHPA–n–hexane system using the rotating diffusion cell technique
M.A. Hughes (Bradford, U.K.) and R.K. Biswas (Rajshahi, Bangladesh) 281
The kinetics of aluminium (III) extraction from sodium hydroxide solutions by an alkylated hydroxyquinoline (Kelex 100)
T. Sato and D. Sato (Hamamatsu, Japan) 299
Acid pressure oxidation of pyrite: reaction kinetics
V.G. Papangelakis and G.O. Demopoulos (Montreal, Que., Canada) 309
The precipitation of lead arosite from chloride media
J.E. Dutrizac (Ottawa, Ont., Canada) 327
Development of a process to produce lead oxide from Imperial smelting furnace copper/lead dross
K.A. Chouzadjian, S.J. Roden, G.J. Davis and J.M. Laven (Boolaroo, N.S.W., Australia) 347
Leaching of ^{226}Ra from components of uranium mill tailings
E.R. Landa (Reston, Va., U.S.A.) 361
Purification of rare earth oxide mixtures from a concentrate obtained during the processing of apatite
M. Milanova, N. Minkova and D. Todorovsky (Sofia, Bulgaria) 369

Technical Notes
Sulphuric acid pressure leaching of Cu–Ni–Co matte obtained from copper converter slag — optimisation through factorial design
S. Anand, R.P. Das and P.K. Jena (Bhubaneswar, India) 379
Purification of bis (2-ethylhexyl) monothiophosphoric acid
H.-J. Bart and J. Reidetschläger (Graz, Austria) 389
The binary adsorption of gold cyanide and ethyl xanthate onto activated carbon
B.D. Young, J.D. Le Roux and A.W. Bryson (Johannesburg, South Africa) 395

Announcements 403
